David,

Our catalog is in! I'm dropping one in the mail to you today. Give me a call when your next fountain or water feature project comes up.

On another note - the garden looks great! I was hesitant when my wife wanted to hire someone to do it. I figured I'd do it one weekend and it would be good enough. What you guys did was more than simply digging a hole and planting a bush - it's artistry - the "layout" of the plants and flowers is what makes it perfect. I guess that's why my wife put her foot down and said she was outsourcing it. No way I could have done that.

Thanks for your hard work!

Bill,

Thanks for getting back to me with your info so quickly. As I had suspected, I think there may be some opportunities for us to work together professionally as well. (Though I'm looking forward to working for you personally). I have had several clients approach me about doing fountains and even swimming pools. (the latest being a project at Arcadia University).

C.M. Jones is really becoming talented at structural concrete, decorative tile and coping but I don't see us ever getting involved with the systems design or install. I'm glad I have someone as a "goto person" when I get involved in this stuff in the future instead of just passing altogether.

I'll get your mulch delivery scheduled in the meantime

Have a great week.
