Re: Recent Landscape Installations by CM Jones, Inc.

David:

With the day-to-day focus on responding to project schedules and demands, it is easy to forget that accomplishing successful projects is a team effort. With this in mind, I wanted to take a moment to thank you and **CM Jones, Inc.** for all your efforts with the recent installation at Colorcon World Headquarters, Lower Salford Twp, PA and American Cancer Society's Hope Lodge in Cheltenham Township, PA.

Your effort to provide quality plant material, schedule installations in a timely manner even when construction schedules by others may not have been what were anticipated, desire to produce a quality end product, and open and available communication, all contributed to these successful projects. We especially appreciate that as the need for field adjustments presented themselves, you always displayed a willingness to work together to find appropriate solutions.

As it continues to develop, the Colorcon landscape including both intensive roofscape and general site landscape will serve the Owner well, providing visual amenity for employees and guests while achieving environmental benefit to the natural systems of the site. As you know the Colorcon project is being considered by the Montgomery County Planning Commission for a planning award and the site treatment is a big factor in their review. The landscape at Hope Lodge continues to receive complements as well. Both of these projects reflect your input. We look forward to future collaborations with you and CM Jones.

Warm regards,

James R. Faber, ASLA
